PUBLICATIONS

- de Miguel MP,Alcaína Y, de la Maza DS, López-Iglesias P. Cell metabolism under microenvironmental low oxygen tension levels in stemness, proliferation and pluripotency. *Curr Mol Med*. 2015;15(4):343-59. Article. IF: 2.912; Q2.
- del Barrio JLA, Chiesa M, Ferrer GG, Garagorri N, Briz N, Fernández-Delgado J, Valls MST, Botella CC, García-Tuñón I, Bataille L, Rodríguez A, Arnalich-Montiel F, Ribelles JLG, Antolinós-Turpin CM, Gómez-Tejedor JA, Alio JL, de Miguel MP. Biointegration of corneal macroporous membranes based on poly(ethyl acrylate) copolymers in an experimental animal model. *J Biomed Mater Res A*. 2015;103(3):1106-18. Article. IF: 3.263; Q1.
- del Barrio JLA, Chiesa M, Garagorri N, García-Urquía N, Fernández-Delgado J, Bataille L, Rodríguez A, Arnalich-Montiel F, Zarnowski T, de Toledo JPA, Alio JL, de Miguel MP. Acellular human corneal matrix sheets seeded with human adipose-derived mesenchymal stem cells integrate functionally in an experimental animal model. *Exp Eye Res*. 2015;132:91-100. Article. IF: 2.998; Q1.
- Fuentes-Julián S, Arnalich-Montiel F, Jaumandreu L, Leal M, Casado A, García-Tunon I, Hernández-Jiménez E, López-Collazo E, de Miguel MP. Adipose-derived mesenchymal stem cell administration does not improve corneal graft survival outcome. *Plos One*. 2015;10(3):e0117945. Article. IF: 3.057; Q1.
- López-Iglesias P, Alcaína Y, Tapia N, Sabour D, Arauzo-Bravo MJ, de la Maza DS, Berra E, O'Mara AN, Nistal M, Ortega S, Donovan PJ, Scholer HR, de Miguel MP. Hypoxia induces pluripotency in primordial germ cells by hif1 alpha stabilization and Oct4 deregulation. *Antioxid Redox Sign*. 2015;22(3):205-223. Article. IF: 7.093; D1.
- Llanos-Pérez JA, Betancourt-Mar A, de Miguel MP, Izquierdo-Kulich E, Royuela-García M, Tejera E, Nieto-Villar JM. Phase transitions in tumor growth: II prostate cancer cell lines. *Physica A*. 2015;426:88-92. Article. IF: 1.785; Q2.
- Nistal M, González-Peramato P, de Miguel MP. Florid cystic mullerianosis of the testis: new pathological entity originating from a peculiar Mullerian differentiation of the testicular vaginal mesothelium. *Histopathology*. 2015;66(7):1037-41. Letter. IF: 3.425; Q1.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 7. Ovotesticular DSD (True Hermaphroditism). *Pediatr Devel Pathol*. 2015;18(5):345-52. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 8. Persistence of embryonal remnants in the testis and epididymis. *Pediatr Devel Pathol*. 2015;18(5):353-61. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 5. Gonadal dysgenesis. *Pediatr Devel Pathol*. 2015;18(4):259-78. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 6. Male undermasculinization. *Pediatr Devel Pathol*. 2015;18(4):279-96. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 3. Testicular development from birth to puberty: Systematic evaluation of the prepubertal testis. *Pediatr Devel Pathol*. 2015;18(3):173-86. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 4. Pubertal and adult testis. *Pediatr Devel Pathol*. 2015;18(3):187-202. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 1. Normal development of testicular structures: From the bipotential gonad to the fetal testis. *Pediatr Devel Pathol*. 2015;18(2):88-102. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 2. testicular descent.

Pediatr Devel Pathol. 2015;18(2):103-8. Article. IF: 0.777; Q4.

- Rada P, Rojo AI, Offergeld A, Feng GJ, Velasco-Martin JP, González-Sancho JM, Valverde AM, Dale T, Regadera J, Cuadrado A. WNT-3A regulates an axin1/NRF2 complex that regulates antioxidant metabolism in hepatocytes. *Antioxid Redox Sign.* 2015;22(7):555-71. Article. IF: 7.093; D1.
- Ramos-Levi AM, Marazuela M, Paniagua A, Quinteiro C, Riveiro J, Álvarez-Escola C, Lucas T, Blanco C, de Miguel P, de Icaya PM, Pavón I, Bernabéu I. Analysis of IGF(CA)19 and IGFBP3-202A/C gene polymorphisms in patients with acromegaly: association with clinical presentation and response to treatments. *Eur J Endocrinol.* 2015;172(2):115-22. Article. IF: 3.892; Q1.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 10. Ectopic and heterotopic tissues in the testis. *Pediatr Devel Pathol.* 2015;18(6):446-57. Article. IF: 0.777; Q4.
- Nistal M, Paniagua R, González-Peramato P, Reyes-Múgica M. Perspectives in pediatric pathology, chapter 9. Alterations in the number and location of the testis. *Pediatr Devel Pathol.* 2015;18(6):433-45. Article. IF: 0.777; Q4.
