COMPOSITION

María Gemma Fernández Juárez.
Jefa de Servicio en Nefrología. Hospital Universitario La Paz

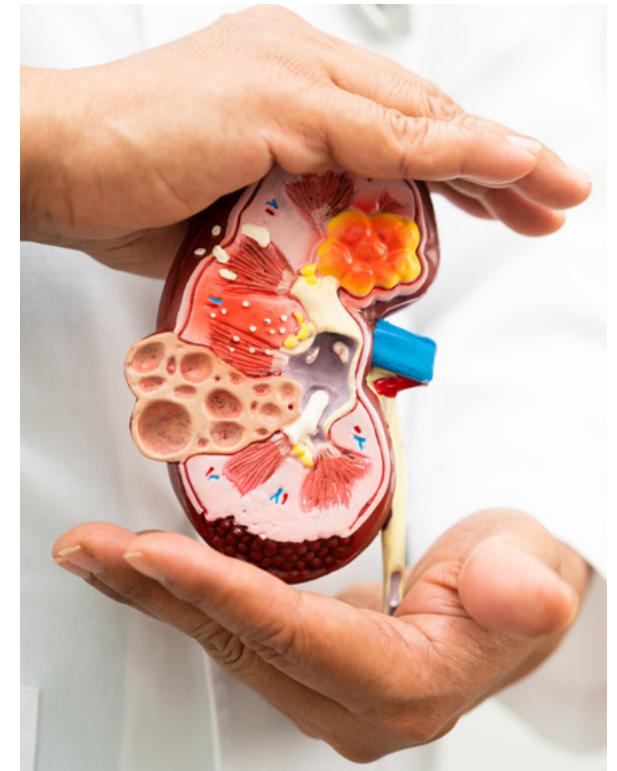

- **María José Castro Notario.** Enfermera. Hospital Universitario La Paz
- **Olga Costero Fernández.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Gloria del Peso Gilsanz.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **María Elena González García.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Carlos Jiménez Martín.** Jefe de Sección de Nefrología. Hospital Universitario La Paz
- **María Ovidia López Oliva.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Almudena Pérez Torres.** Dietista-Nutricionista. Hospital Universitario Santa Cristina
- **Begoña Rivas Becerra.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Amir Shabaka Fernández.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Rafael Jesús Sánchez Villanueva.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz

STRATEGIC OBJECTIVES

- The strategic objective of this care-research group is to enable, by developing a deep understanding of the various components that make up nephrology (kidney diseases in initial stages, progression of kidney disease, particular and general complications of dialysis and kidney transplantation), access by affected patients to the best diagnostic and therapeutic interventions available at any time. Each of the areas must ensure a minimum level of research and development activity representing the innovation in these areas. The lines of research are at times cross-sectional to the four components indicated for overall nephrology

RESEARCH LINES

1. Glomerular nephropathies:
 - Role of PLA2r levels in membranous nephropathy.
 - Study of the alternative pathway of complement in glomerular pathologies: vasculitis, membranous nephropathy, IgA glomerulonephritis...
 - Morbidity, mortality and progression of diabetic nephropathy and other glomerular nephropathies.
 - Adult polycystic kidney disease. Family studies and therapeutic approaches.
 - Association between cardiovascular disease and progression of nephropathies (NEFRONA multicenter studies).
2. Renal replacement therapy:
 - Evolution of peritoneal function in peritoneal dialysis. Implications for patient and technique survival. New peritoneal dialysis devices and solutions. Aquaporin 1 and its genetic polymorphisms. Involvement of alternatively activated macrophages and CC
 - Cardiovascular risk in dialysis patients. Study of endocrine alterations in dialysis patients. Role of FGF 21 in uremic insulin resistance.
 - Mouse model for peritoneal dialysis: exploration of the effects of dialysis fluids, pharmacological interventions and genetic manipulation (KO, transgenic).
3. Complications of renal transplantation.
 - Infection and CMV disease in renal transplantation. Personalized treatment.
 - Graft tolerance.
 - Quality of life of the transplanted patient. Patient-reported transplant outcome.
 - Individualization of immunosuppression.
 - Knowledge of graft cortical microcirculation.
 - Continuous active collaboration with the Spanish renal transplant group (SENTRA), some led by the La Paz group: Covid disease, renal prevention (iSGLT-2), pregnancy in renal transplantation, bacterial infections, thrombotic microangiopathy, asystole donation, relapses of different renal diseases after transplantation...

3.4 Large System Pathologies Area

RESEARCH ACTIVITY

Doctoral theses

- Tejera Muñoz A. El factor 2 de la red de comunicación celular (CCN2) ejerce un papel esencial en el mantenimiento de la estructura y las respuestas vasculares de la aorta en ratones.[dissertation]. Madrid: UAM; 2023(24/03/2023). Director: Ruiz Ortega M, Rodrigues Díez, R.
